

Team Presentation Report

Group Name: Fantastic Four

Objective: Create a website and presentation using LATEX and HTML

Group Members: Jerry Steve Jeanty, Shafi Jayed, Pranaav Venkatasubramanian, Bryan Belizaire

Summary: Create a website profile for all four members of the group. Then create a presentation on Latex. Have the presentation be used as an introduction to Latex and include a feature that you enjoy/find most useful within the program. Upload the presentation slides and the website source code directly to the website as well as the report.

All required tasks (Website, Presentation Slides, Report, Source Code) have been completed.

Website Overview:

- All four group members pictures and names have been added to the site.
- Presentation slides have been added and can be viewed using the arrow buttons.
- All source code has been added and index.html, styles.ccs and main.js can each be viewed separately.

Project Presentation Overview:

- Intro to Latex, including installation and basic Syntax.
- Creation of math equations using the system.
- More on math syntax and tabulation of data in the program.
- Citations and changing language.

Source Code Overview:

- index.html holds the code for the design of the website including text and images.
- styles.ccs sets the boxes and locations of each portion of the website.
- main.js holds the code for interactive parts of the website.

Conclusion:

Using HTML and Latex you can create outstanding websites and documents. The tools allow you to create your own, if you take enough time to learn how to use them to the best of your abilities. Complete mastery of either can increase your skill set and abilities massively, so learning these tools can only benefit you and widen your scope and make your vision a reality.
